

Delaware State Senator Nicole Poore, State Senator Bethany Hall-Long, and State Representative Valerie Longhurst visited the Kuehne Company, Delaware City, Delaware Plant on Tuesday, February 23, 2016. The three elected leaders wanted to learn more about the facility in which many of the constituents who live in their Districts work and the Kuehne Company's business role in the region. They were all impressed by Kuehne's impact on the city water and waste water treatment capabilities, our safety record, and our work to become more efficient with recovering resources like process water and hydrogen.
